The people can get the growth in business by using these solutions and also by decreasing the size of the sensor used in the palm vein, by decreasing the legally valid time. eAAeA Numbers and positions of veins and their crossing points are all compared and, depending on verification, the person is either granted or denied access. Thus, we can say that the technology is very secured or protected.What happens if the Registered Palm Gets Damage?If the registered palm gets damage the then we cannot avail the technology and also it is prescribed to take veins of two hands because if one gets damaged then the users can retrieve the data through the other hand.Advantages of the Palm Vein Technology:The advantages of the palm vein technology are as follows:It has the feature of the accuracy.It has the feature of the reliability.It is cost effective.Also See: Smart Dust PPT with PDF ReportDisadvantages of the Palm Vein Technology:The disadvantages of the palm vein technology are as follows:It contains many factors that can affect the captured picture and also its quality; the affecting factors include the temperature, focus, humidity, radiation of heat and much more.It is not available in a bulk production due to the expensive features.Applications of the Palm Vein Technology:The palm vein technology is used in distinct fields because of its features and some of its application fields are as follows:ATMHospitalsAuthenticationGovernment officesPersonal computersLibrariesBankingIssuing of Fujitsu's advanced palm vein technology is used on a large scale in Japan, the use of palm vein technology can solve many problems in our country such as password protection in ATM, protection in many fields and use in applied science in government offices makes employees work according to government times. ROI Extraction Preprocessing Steps Image Segment Pattern Palm Vein Extraction Features Coinciding B. The technology of the palm vein will bring a revolutionary change in the field of science and technology. Content of the Seminar and pdf Report for Palm Vein TechnologyIntroductionOur current security measures How it works?ApplicationAdvantagesDisadvantagesConclusionReference Here we are giving you Palm Vein Technology Seminar and PPT with PDF report. The feature similar to Minutiae could also be extracted from the palm vein pattern; however, the Hausdorff distance algorithm applied in the minutiae analysis is sensitive to geometric transformation. Technological advantages Disadvantages fingerprint •Popular • Cheapest • Precise voice of lingerie •No invasive •Iris and Retina of Levadura Precise •Very accurate •Invasive •Expensive • Sensitive palm tree •No invasive •Relatively inexpensive • Question •Desfat •Desfat 8. • The arteries and capillaries, whose blood contains oxygenated hemoglobin, which does not absorb near infrared light, are invisible to the sensor, so we choose "VEINS". > Biometric authentication technology focused on four methods: sFingerprints launderingQuick recognition 1 Voice recognition risIris Recognition 5. If you liked it then please share it or if you want to ask something, please click the comment button. 39:52+00:00 ThakurECE Palm SeminarsTechnology Seminar and PPT with PDF Report: Due to the improvement in the sign of the danger of technology for personal staff ylailtini nosrep laudividni nA:ecnicS deilppA nieV mlaP fo sisaB ehTsniev mlaPstnirpregniFstnirp ecioVsecaF:swollof sa era seuinhcet esohT dna seuinhcet roof depoleved dna dekrow ustijuF seussi esehT lla diova ot ;resu eht yb nettogrof eb nac dna srehto eht yb desseug eb nac sdrowssap dna srebmun eht , Srehto yb nelots ro tsol eb nac sdrac noitaicftmedi eht ,esion ot Tcejbus DNA Elacsyarg Si Nretetap Nretap Niev Mlap Derutpaec EHT, Yilamron A A e e A e .72. sucof dna noitarbilac aremac ,ecafrus ot niev fo ssenraen ,noitaider taeh ,ytilimuh ,erutarepmet yidob sa hcus egami derutpaec eht fo yilauq eht tceffa nac taht strotcaf suoremn era ereht A eAAeA segatnavdasID ,eman rieht ogis ro draoyek a no EPTY, KAEPs, Klaw SRESU NEHW, resu a fo inemevom eht erusaem scilsiretcarahc laroivahab eht A e . Therefore, it is necessary to develop a new world of coincidence that can effectively solve this problem. A e e Security in various fields and if we implement this technology in government offices we can make employees work as government times. A e e Apart from other techniques such as the scarce iris in which the replacement of cataracts, the scan of fingers during injuries etc can be a disadvantage, the technique of the palm vein has no problems. Ma e all LHD has good experiment results. A e e The authentication of the palm vein has a high level of authentication due to the singularity and complexity of the venous patterns of the palm. All of images A e e The image is the main part of this technique since the image of a vein pattern is obtained in the first step. I am passionate about blogging. Base of the Palm-Vein technology A e e The image of the palm vein of an individual becomes for algorithms into data points, which was then compressed, encrypt and stored by the software and registered together with the other details in its Profile as a reference for future comparison. The image of the palm vein is transformed through the proceedings step by step into the data points, after this, the image is subjected to the encryption process and compression and, finally, it will be saved, about 0% in 140000 hands. Image of the patron of vein 12. A e e The veins present in the individual's palm scan & quot. Verifying access. 13. 7. CONCLUSION A e e If this technology is introduced into our country we can solve many problems such as password protection in ATM. This pagina consists of Palm Vein Technology Seminar and PPT with PDF report. See also: Telepressure and PPT seminar with PDF Palm Vein Technology Report PDF Report and PPT The technology of the vein of the vein has the applications in many fields or areas such as banking, government offices, the issue of the passport and also the 23. What is Palm-Vein technology? All you need to do is just click on the download link and get it.Palm Vein Technology PPT and Seminar Free DownloadPalm Vein Technology pdf Report Free DownloadIt was all about Palm Vein Technology Seminar and PPT with pdf report. How secure is this technology? 11. eAAeAThe palm vein authentication uses the vascular patterns of the palm as personal identification data eAAeAIf there is a match then access is allowed, if not access is denied. A near infrared ray is a component of sunlight, whose effect is much less than walking in sunlight. eAAeAThis system is not at all dangerous. Hand vein is a biometric modality that seems promising as it is acquired in Near Infrared light (NIR), which implies that skin variations and dirtiness are less sensible than in visible light. eAAeA Feature extraction plays an important role in palm vein recognition because the performance of feature matching is greatly influenced by its output eAAeA Feature matching is achieved by check whether the input image exist in the database to give the permission to that person being authenticated. eAAeA Noise Reduction and Contrast Enhancement are crucial to ensure the quality of the subsequent steps of feature extraction. Matching based on minutiae analysis and Hausdorff distance (MHD) was used for hand vein recognition. Unfortunately at this moment, there is no public database allowing verifying these figures. eAAeA It is still relatively expensive and not available for mass production yet. eAAeA There are two imaging methods used for veins 1.Reflection 2.Transmission. Besides P2PM, LHD and MHD, all existing matching methods suffer from the problem of image rotation and shift. Business growth will be achieved with these solutions by reducing the size of the palm vein sensor and shortening the authentication time. Applications 24. THANK YOU!! The pattern of palm vein technology was developed by Fujitsu and this Applied Science Leverages vascular patterns like private private information Need for Palma Veicive Technology The main problem of this database is the low resolution of the images (images in resolution 132x124 pages). e a ,~ a e Also, the patron of the strange vein of infrared rays images is represented as dark lines. Reading a free preview, paginas 13 to 21 are not shown in this preview. 16. The ICP algorithm was first proposed by Besl and McKay and was originally used in the three -dimensional range images (3D). I download your reports for Palm Vein technology ?????????? This document deals with the Palm Vein technology, its applications, this technology is applied in real -time applications and the advantages of using this technology. In general, in the various documents present in the literature, after the acquisition phase, some coincident algorithms are used, such as all the distance of Hausdorff (LHD) of the line segment. The advantages of the precise technology of precise disadvantages of palmsecure .00008% .01% fingerprint 1-2% 3% Iris .0001% - .94% .99% - .2% voice 2% 10% 20. Physiological characteristics would be physical features such as fingerprints, hand, eyes and face, veins, etc. 4. 21. Disadvantages of other techniques 6. Advanced techniques to protect the basic data from strange Indian an Indian an an Indian am an Indian am an Indian Am Ah Blogger. The Detail of the ICP algorithm is explained later in the report. In the world proposed, we first extracted information from the vein of the inter -s (Roi) region. A e a ,~ a e Escener uses a special hemoglobin characteristic which crosses the veins of the palm: absorbs the nearby infrared light. In addition, the hemoglobin that flows in the veins is sensitive to light, in this way, allowing a good quality of acquisition of the veins of the hands. veins. veins.
